IMPLEMENTATION OF HEALTH PROTOCOL IN THE EFFORT OF COVID-19 PREVENTION AND CONTROL AT PT DAIWABO GARMENT INDONESIA

xv + 95 halaman + 10 tabel+ 5 gambar + 6 lampiran

Background: PT Daiwabo Garment Indonesia applies the prevention and control of COVID-19 in the work environment so that workers still feel safe and protected when in the work environment, but there are parts of the production flow that have a high risk of being exposed to the Covid-19 virus, namely the inspection section.

Research Objectives: This research action aims to find out how to implement health protocols as an effort to prevent and control covid-19 at the inspection section of PT Daiwabo Garment Indonesia

Research Methods: This research method uses an action research design with a qualitative approach supported by statistical data with triangulation of sources through in-depth interviews with key informants and triangulation informants to seek apperceptions of various sources.

Results: The results of the study found that after the researchers, the management made improvements in the delivery of policies to the inspection workers so that they could be well received, namely through posters, flyers, and PT Daiwabo Garment Indonesia's social media.

Conclusions: The results of the study found that after the researchers, the management made improvements in the delivery of policies to the inspection workers so that they could be well received, namely through posters, flyers, and PT Daiwabo Garment Indonesia's social media.

Suggestion: The advice given from the results of this research action is to the management should create a special team to carry out direct monitoring in the field so that workers do not neglect to apply health protocols.
