Speech From Rector of Galuh University

**ACER-N 2019: GALUH EDUTECHNO PEDAGOGY CONFERENCE, TIE ALLSAW, YSSCE
SHANTIKA TASIKMALAYA HOTEL, 15TH AUGUST 2019**

His Excellency Director of Career and Human Resources Competencies, Ministry of Research, Technology, and Higher Education, Indonesia, Prof. Dr. Bunyamin Maftuh, M.A.
The honourable:

The Head of LLDIKTI, West Java-Banten, Indonesia, Prof. Dr. Uman Suherman, M. Pd.

The President of ACER-N, Prof. Nor Aisyah Buang, Universiti Kebangsaan Malaysia

Esteemed Keynote Speakers, Invited Speakers, and all other speakers,

Distinguished co-host institutions, institutions members, guests, Participants,

Ladies and Gentlemen

Assalamu'alaikum warahmatullahi wabarakatuh

May peace and God's Mercy and blessings be upon you all.

Good morning,

On behalf of Galuh University, I would like to thank you for attending to this academic and prestigious event. For Galuh University, this fifth international conference ASEAN Conference Educational Research-Network is series of scholarly milestone that our university, Galuh University, is able to engage together a large number of people from different groups of policy makers, researchers, course practitioners, classroom teachers, curriculum developers, materials designers, teacher, supervisors, and testing and assessment developers, of both local and foreign countries in order to participate in this international conference.

Realizing the grace of this occasion, it is my honor to welcome you all at the fifth ASEAN Conference Educational Research-Network 2019 concurrently with Galuh-EduTechno Conference, The 4th The International English Applied Linguistics and Workshop (TIE ALLWAS), and Young Scholar Symposium in Comparative Education. I wish to extend my sincere gratitude to all respected delegates and all participants for attending this conference and fully involving in every single agenda within this conference. The theme of the conference, "Education Innovation in Industry Revolution 4.0", is about framing the educational context innovatively for facing digital era. This conference, I believe, will provide new insights from practitioners, researchers, and experts on the innovative education as the equipping phase for 21st century learning needs.

Ladies and gentlemen, let me take this opportunity to congratulate the Organizing Committee for contributing outstanding and awesome effort to make successful conference.

I wish all ACER-N speakers, presenters, and participants having fruitful discussion, worth feedback, and great accomplishment, and I expect everybody finds the conference and your stay in Tasikmalaya rewarding and memorable.

Have a Great Conference! Thank you!

Wassalamu'alaikum warahmatullahi wabarakatuh

Dr. H. Yat Rospia Brata, M. Si

Rector of Galuh University

ACER-N President Welcome Note

Dear Excellences, Distinguished Guests, Academics Colleagues, Ladies and Gentlemen

It is a true pleasure for me to welcome you to the Fifth ACER-N conference, this time in Indonesia, specifically at University of Galuh (UNIGAL). I am very grateful to the Rector of UNIGAL, Dr. H. Yat Rospia Brata, Drs., M.Si, the Vice Rector Bapak Iskhak and their lecturers for spending their precious time to host this conference. I also wish to thank all the keynote speakers from Malaysia, Indonesia, Thailand, Taiwan and Singapore for sharing their expert knowledge with all the participants. It is also an honour to welcome representatives from our partner academics as well as experts from all areas of education such as science and engineering, social science and language. And I would like to greet Indonesia's representative from the Federal governments' departments.

I also would like to share with you about the ASEAN COMPARATIVE EDUCATION RESEARCH NETWORK (ACER-N) organization which had been formed in 2014 by the Faculty of Education, Universiti Kebangsaan Malaysia. ACER-N vision is to bring together all our researchers in education from all ASEAN countries to share our academic activities such as research, publication and expertise. As of today, ACER-N had been successful in organizing her fifth conference. We are grateful with the current development because we were able to bring in our Thailand partner from Khon Kaen University. Hopefully, in the near future, we can extend our participation from other ASEAN countries like Singapore, Vietnam, Cambodia, Philippines, Myanmar and Brunei. This network is a voluntary organization and thus no cost is imposed on any member country. This year also saw ACER-N conference is organized with other organizations as well such as I-STEM group from Thailand, Galuh Edutechnological Pedagogy group, The International English Applied Linguistics group (TIE ALLSAW, and Young Scholar Symposium in Comparative Education group (YSSCE). ACER-N hope to work with other organizations as well in the future from other ASEAN countries without prejudice.

Moving forward, I hope ACER-N with her ASEAN partners will be more active in working together not only in organizing conference but co-researching in education issues across ASEAN countries so that we can learn from each other and improve our education curriculum, pedagogy, assessments and system from there. Lastly, again from the bottom of my heart I would like to thank UNIGAL and all of you for making this conference realized.

Thank you

President of ACER-N
Professor Dr Nor Aishah Buang
Universiti Kebangsaan Malaysia

General Program/Schedule
5th ACER-N INTERNATIONAL CONFERENCE
(ASEAN COMPARATIVE EDUCATION RESEARCH NETWORK CONFERENCE)
Hosted by Galuh University
SANTIKA HOTEL, THURSDAY, 15th AUGUST 2019

TIME	EVENT	VENUE
07.00-08.00	REGISTRATION	Ballroom Lobby
08.00-08.30	OPENING CEREMONY 1. Reciting Holy AlQur'an 2. Singing Indonesian National Anthem 3. Work Report by conference chair (UNIGAL) 4. Addressing Speech by ACER-N Board 5. Welcome address by UNIGAL Rector 6. Opening remarks (Prof. Dr. Uman Suherman AS, M.Pd, The Head of LLDIKTI, West Java-Banten, Indonesia) 7. Photo session	Ballroom
08.30-08.40	Rampak Jaipong Dance	Ballroom
08.45-09.35	Conference Keynote 1 (YOUNG SCHOLAR SYMPOSIUM IN COMPARATIVE EDUCATION): Educational Human Resource Development in Higher Education in the 4.0 Era: Indonesian Perspectives Prof. Dr. Bunyamin Maftuh, M.A. (Ministry of Research, Technology, and Higher Education, Indonesia)	Ballroom
09.35-09.50	Coffee Break	Ballroom Lobby
09.50-10.50	Conference Keynote 2 (Special Guest) Prof. Dr. Norasmah Othman (Universiti Kebangsaan Malaysia, Malaysia)	Ballroom
10.50-11.35	Conference Keynote 3 (ACER-N) Dr. Jesus C Fernandez (SEAMEO RECFON, Philippines) (in confirmation)	Ballroom
11.35-12.15	Conference Keynote 4 (I AM-STEM) Prof. Dr. Chokcai Yuenyong (Khon Kaen University, Thailand)	Ballroom
12.15-13.15	Lunch Break, Rest/Prayer	Ballroom, Lobby, Swimming Pool Area, Mushola
13.15-14.05	Conference Keynote 5 (TIE ALLSAW) Dr. Gumawang Jati, MA (ITB, Indonesia)	Ballroom
14.10-15.00	Concurrent invited speakers - ACER N+Galuh Edutechnological Pedagogy (Ith Vuthy, M.Sc., Cambodia, SEAMEO-CECCEP)	Ballroom

14.10-15.00	Concurrent invited speakers -I-AM-STEM (Dr. Furzani Binti Pa'Ee, University Tun Hussein Onn, Malaysia)	Edelweis Room
14.10-15.00	Concurrent invited speakers - TIE ALL SAW (Jonathan Rantee Carreon, Ph.D. App. Ling., Ph.D Ling, Huachiew Chalermprakiet University, Thailand)	Tulip Room (2 nd floor)
14.10-15.00	Concurrent invited speakers - YOUNG SCHOLAR SYMPOSIUM IN COMPARATIVE EDUCATION/YSSCE (Dr. Ismail Suwardi Wekke, M.A., Sekolah Tinggi Agama Islam Negeri Sorong, Papua, Indonesia)	Cempaka 2 Room
15.00-16.00	1 st Concurrent paper presentations ACER-N + Galuh Edutechnology	Ballroom
15.00-16.00	1 st Concurrent paper presentations I AM STEM	Edelweis Room
15.00-16.00	1 st Concurrent paper presentations TIE ALLSAW	Tulip Room (2 nd floor)
15.00-16.00	1 st Concurrent paper presentations YSSCE	Cempaka 2 Room
16.00-16.15	Coffee Break	Ballroom
16.15-17.15	2 nd Concurrent paper presentations ACER-N+Galuh Edutechnology	Ballroom
16.15-17.15	2 nd Concurrent paper presentations I AM STEM	Edelweis Room
16.15-17.15	2 nd Concurrent paper presentations TIE ALLSAW	Tulip Room (2 nd floor)
16.15-17.15	2 nd Concurrent paper presentations YSSCE	Cempaka 2 Room
17.15-17.30	Closing Speech by Chairman of Conference	Ballroom
17.31	End of Conference & Certificate Distribution	Ballroom Lobby
19.00-21.00	Conference Dinner and Students' Performance (Invited guests & speakers only) -Thanking Speech by Rector -Singing & Dancing -Kacapi Suling Performance	Ballroom

*Programme***5th ACERN (ASEAN COMPARATIVE EDUCATION RESEARCH NETWORK CONFERENCE)**

“Education innovation for the fourth industrial revolution 4.0 in ASEAN countries”

Thursday, 15 August 2019

**Santika Hotel, Tasikmalaya, West Java
Indonesia**

1st Concurrent paper presentations

Category : ACER-N and Galuh Edutechnology

Venue : Ballroom

PIC : Didih Faridah, M. Pd and Intani Permata Rizki, S. Pd.

Time : 15.00 – 16.00

Table No	Title	Presenter	Institution	Moderator
1	An Analysis on the Students' Capability in Writing Short Stories	Ikin Syamsudin Adeani	Universitas Galuh	Hendra Rustiawan
	Teaching Factory and Technopark: Bringing Together Schools with the world of industry, Business, Training, and Entrepreneurship	Somariah Fitriani, Abd. Rahman	Universitas Muhammadiyah Prof. Dr. Hamka	
	Ronggeng Philosophy Values in the History of History Learning in History Student Program Students	Wulan Sondarika, Dewi Ratih	Universitas Galuh	
	The Influence of Headmaster Academic Supervision towards Teacher Profesionalism and its Relation to Learning Process Quality: A Case Study at Elementary Schools in Indonesia	Desi Nurani	Universitas Galuh	
3	“Learning Cycles” for Adult Education in Postgraduate School	Abdul Rohman, Enas, Runalan	Universitas Galuh	In In Supianti
	The Effect of Outdoor Education and Sports Attitude Towards Self Esteem	Dede Iman Suhendra, Andang Rohendi, Dikdik Primadani	Universitas Galuh	
	Students Language Attitude and the Guidance Model Design	Asep Hidayatullah	Universitas Galuh	
	The Application of Simple Accounting Format in Traditional Shop	Dedeh, Dendy S Akbar, Rizka A putra	Universitas Galuh,	

5	Polite Language Education Strategies in Teaching Speaking in Indonesian Language Courses: How Applicable?	Taufik Hidayat, Rina Agustini	Universitas Galuh	Kiki Endah
	Developing Life Skill Based-Guidance and Counseling To Promote College Students Prospective Careers	D. Rukaesih	Universitas Galuh	
	Improving Analytical Skill Students of Geography Education Department, Siliwangi University using "The Power of Two Learning" strategy	Ely Satiyasih Rosadi	Siliwangi University	
	Contribution of Education Management Services toward Satisfaction and Loyalty for Private University Students	Elly Resly Rachlan	Universitas Galuh	
7	Evaluation on implementation school based management (SBM) in improving Education Quality	Ihsana El Khuluqo, Abdul Rahman A. Ghani	Universitas Muhammadiyah Prof. Dr. Hamka	Nur Ilmiyati
	An Exploration of Indonesian EFL Teaching Anxiety across gender	Dinda Permatasari, Herri Mulyono, Gunawan Suryoputro	Universitas Muhammadiyah Prof. Dr. Hamka	
	Development of "Kata Sepat" Flash Games as Learning Media of Quadrilateral for Junior High School Students	Nurina Hidayah, Nur Baiti Nasution, Fahmi, Irfan, Hasyim Asyari, Hendy	Universitas Pekalongan	
	Using Discovery Learning Method to Improve Critical Thinking Ability in Students Who have a High and Low IQ on Economic Lessons	Ilah, Rita Patonah	Universitas Galuh	

2nd Concurrent paper presentations

Category : ACER-N and Galuh Edutechnology

Venue : Ballroom

PIC : Didih Faridah, M. Pd and Intani Permata Rizki, S.Pd

Time : 16.15 – 17.15

Abstract

"Kata sepat" flash game is adapted from the "Kata Sepat" game card. "Kata Sepat" game has a purpose as a medium of mathematics learning for junior high school students on quadrilateral material. This research belongs to developing research adopting a 4D model that focuses on the development stage producing product design and validity. This product has an initial design in the form of a simple card game as the initial prototype. Then it is redesigned to produce prototype 2 in the form of flash. To know the validity level of the product, validation was carried out by several experts. It is viewed on various aspects including navigation, text/writing, interface, and contents aspects. The validation analysis showed the obtained calculation, 4,56, which was very valid category. Yet, it is necessary to do a trial on small-scale learning and improvement of several things in the game display.

Keywords: *kata sepat, media of mathematics learning, quadrilateral*

INTRODUCTION

In the current era of information and technology which is relatively fast, mathematics still has an important role. So that in Indonesia mathematics is taught starting from the basic to the upper secondary level. In elementary school students, 80% of 20 students stated that mathematics is an important subject, but as many as 45% thought mathematics was difficult to learn (Siregar, 2017). This is also experienced in male students in junior high school who have negative perceptions and mathematical creative thinking dispositions in the medium category in mathematics (Anggoro, 2016).

More specifically on quadrilateral material, revealed the causes of students' mistakes in general, namely the ability of students who are less in interpreting the intent of the problem, understanding of students who are lacking in interpreting the intent of the problem, understanding students who lack the concept of mathematical calculations, and understanding less mathematics (Amdam, 2017). Also, quadrilateral material problems are conceptual errors, factual errors, and principle errors (Putra, Jaeng, & Sukayasa, 2016). The misconception is that students are incorrect in using the broad formula and around and misunderstanding the story. The erroneous fact that is incorrect or does not write down the unit area and circumference in progress. The principle mistake is not being able to change story problems into mathematical models.

These problems can be overcome in the learning process by using learning media. Learning media, according to Kemp & Dayton (1985: 8) can fulfill three main functions (1) motivating interests or actions; (2) presenting information; (3) giving instructions (Arsyad, 2016). As in learning mathematics with the help of Macromedia Flash, it gets a very interesting response from students (Masykur, Nofrizal, & Syazali, 2017).

Macromedia Flash is software that can be used to create animations and games that

can be exported in the form of shockwave or executable files. In addition to Macromedia flash, there is also software for creating animations, SwishMax. The menus in SwishMax are relatively easy to use. Slightly different from Macromedia flash, each animated text must be arranged one by one, while in SwishMax there are various types of animated text available. In the process of developing flash-based "*kata sepat*", the SwishMax application is used.

It can be said that the SwishMax application is included in multimedia. Description of multimedia is the use of computers to present and combine text, sound, images, animation, audio, and video with tools and connections so that users can navigate, interact, work and communicate (Wikipedia, 2019). The tool used in this case is a computer. There are several kinds of computer-based learning programs, one of which is instructional games. A well designed game program can motivate students and improve their knowledge and skills (Arsyad, 2016). The mastery of learning mathematics students who use computers in the learning process is 26.51% higher than conventional learning (Riyadi & Pardjono, 2014).

Flash-based "*kata sepat*" game is one of the alternatives presented to overcome problems in mathematics subjects, especially quadrilateral material. Some quadrilateral material that is discussed in the development of flash-based "*kata sepat*" is square, rectangle, parallelogram, rhombus, kite, and trapezoidal isosceles. This includes the shape of each quadrilateral, its properties, area, and circumference. Through development, it is known that the flash-based "*kata sepat*" is worthy of being used for mathematics learning.

METHODS

This research is development research with a 4-D (Four-D) model which includes define, design, develop, and disseminate (Thiagarajan & Sivasailam, 1920). This study is only to define, design, and develop. The techniques and data collection instruments used were documentation and questionnaires. The questionnaire instrument was used to validate the flash-based "*Kata Sepat*" products. Aspects contained in the validation sheet include navigation, writing, interfaces, and contents with 23 statements. This validation sheet is used to see the feasibility of flash-based "*kata sepat*" from predetermined aspects. The steps for determining validity are seen from the average of each criterion of the validator, the average of each aspect, and the average total validity which is then matched with the categories specified in table 1.

Table 1. Assessment Criteria for Validation Results

Interval	Kriteria Kevalidan
$1,00 \leq V_a < 2,00$	Not Valid
$2,00 \leq V_a < 3,00$	Less valid
$3,00 \leq V_a < 4,00$	Valid
$4,00 \leq V_a \leq 5,00$	Very Valid

(Hobri, 2010)

Information: V_a is the average total validity of media "*kata sepat*" flash based

RESULTS AND DISCUSSIONS

The initial stage is defined, to describe the basic problems and potential possessed in the junior high school mathematics learning process on rectangular material. The main potential currently possessed is that students at the age of 12-14 years according to Piaget enter the formal stage, namely the beginning of abstract thinking (Suparno, 2001). The progress of students at this stage students does not need to think with the help of objects or concrete events (Ibda, 2015). So that computer-aided mathematics learning is one of the optimal breakthroughs. One type is in the form of multimedia. It is known that computer-based mathematics learning shows the mastery learning is higher than conventional learning (Riyadi & Pardjono, 2014).

Whereas what happens is that there are still difficulties experienced by students in solving problems related to rectangles. This is because several factors (1) have not illustrated the story problem into the picture; (2) memorizing without knowing the concept; (3) do not understand the flat shape based on the characteristics of its characteristics; (4) haste so that they do not understand the meaning of the problem; (5) forget or are lazy to solve problems (Amdam, 2017). Therefore it is necessary to have multimedia that can help students in learning mathematics in flash-based quadrilateral material.

Based on the description of the potential that is owned and the problems that exist then the design phase is carried out. At this design stage, it produces a program called "*Kata Sepat*" which has an abbreviation of "*Kata Pintar Segi Empat*". "*Kata Sepat*" starts from a mathematical teaching aid in the form of a card game with quadrilateral mathematical material. The material presented includes a square, rectangle, rhombus, kite, parallelogram, and trapezoid. All material includes the characteristics, forms/images, as well as terms in English, broad formulas and circumference.

Furthermore, "*Kata Sepat*" was developed with the SwishMax4 application. In Flash-based "*Kata Sepat*" this includes the initial display and the game itself. The game is set so that users can choose the level according to their wishes. In each game, three times are given wrong, if all are used then the game is finished. The game was also given instructions about the order of cards that can be played so that players must be observant to exercise it.

The next stage is development, "*kata sepat*" has an initial design in the form of card games that can be played in various ways. While this flash-based "*kata sepat*" has the same rules as the original version "*kata sepat*".

Figure 1. Preliminary First Prototype Display **Figure 2.** Preliminary Second Prototype Display

In the preliminary view, the change in figure 1 is the initial appearance of the prototype and figure 2 in the second prototype. The difference is that in the initial prototype there was still a loading display and the screen was not fullscreen. In the second prototype, the main menu is displayed directly from "kata sepat" flash-based.

Figure 3 The First Prototype Game Display

Figure 4. The Second Prototype Game Display

The display of the game on "Kata Sepat" based on flash also revised. In the initial prototype, it was still linear starting with the loading display, initial display, playing instructions and then proceeding to the game. Whereas in the second prototype there are some adjusted parts. Next is the validation of flash-based "kata sepat". The validation process uses a questionnaire technique with aspects contained in the validation sheet covering 23 statements, navigation, writing, and media content.

Flash-based "kata sepat" products were validated by 7 validators consisting of 4 mathematics lecturers and 3 math teachers. The results obtained at an average validity
